Albrecht Dürer: Self-Portrait in a Wig

View Delete Edit Text Edit Form Graph Network Paths Triples XML Devel

Self-Portrait (earlier known as Self-Portrait at Twenty-Eight Years Old Wearing a Coat with Fur Collar or Self-Portrait in a Wig) is a painting on wood panel by the German Renaissance artist Albrecht Dürer. Painted early in 1500, just before his 29th birthday, it is the last of his three painted self-portraits. It is considered the most personal, iconic and complex of his self-portraits, and the one that has become fixed in the popular imagination.

The self-portrait is most remarkable because of its arrogant suggestion of divinity in its resemblance to many earlier representations of Christ. Art historians note the similarities with the conventions of religious painting, including its symmetry, dark tones and the manner in which the artist directly confronts the viewer and raises his hands to the middle of his chest as if in the act of blessing. It is likely that Dürer portrayed himself in this way through a combination of arrogance and a desire by a young and ambitious artist to acknowledge that his talent as God given.

This painting Self-portrait with Flower was painted in 1493 by Albrecht Dürer when he was twenty-two years old, in Nürnberg at the end of his trade guild tour. It is one of the very first independent self-portraits in Western painting. The eryngium held by the artist is possibly a pledge of fidelity to his fiancée Agnes Frey, or perhaps an allusion to Christ's Passion (or more specifically to the spikes on the crown of thorns).
